URGES FARM ORGANIZATION

Secretary Houston Says World Needs More Beef and Eggs

Washington, Nov. 13.—Secretary Houston in a statement urges that steps be taken for the better organization of the agricultural forces of the country, especially of the local farm bureaus, in preparation of the execution of the necessary production program for 1919. He dwelt especially upon the need for an increased production of beef and eggs, saying that it seems clear that for a considerable period the world will demand particularly a larger supply than now of these commodities.

"For a considerable period," said Mr. Houston, "the world will have need particularly of a larger supply than normal of live stock, especially of beef and eggs. This should be farmed to meet the demand, even though it means of economically increasing our live-stock products. As a part of our program we should give due thought to the securing of an adequate supply of feedstuffs and to the eradication and control of all forms of animal disease."
